

What is next?

Well so you have gotten through all of the tutorial so far, well there is still a lot to learn those are merely the basics. However by knowing all of that you could now help with programming the robot. If you are interested in learning more than just what I have so far, make sure to keep checking back, because as I learn more I will post more explanations.

Things that will have a tutorial soon:

Programming the Camera from the 2006 season

Interrupts: what are they and how do I use them

Advance Sensors

if there are any questions email them to info@langleyrobotics.com and they will be answered to the best of our knowledge
